

Welcome to the Resident Class of 2013

The Campbell Foundation is pleased to welcome eight outstanding new residents to our training program this year. They are a diverse group, coming to us from as near as the University of Tennessee and as far away as the University of California, but all share a background of academic excellence and a commitment to orthopaedics.

- **Tyler Cannon, M.D.**, a graduate of the University of Tennessee College of Medicine
- **Michael Cusick, M.D.**, from Louisiana State University School of Medicine
- **Justin Hall, M.D.**, a graduate of University of Alabama School of Medicine
- **Nick Larsen, M.D.**, from University of Louisville School of Medicine
- **Joshua Miller, M.D.**, a graduate of UCLA David Geffen School of Medicine
- **Brian Norton, M.D.**, from University of Arkansas for Medical Sciences
- **Chris Potts, M.D.**, a graduate of Mercer University School of Medicine
- **Cason Shirley, M.D.**, from University of Tennessee College of Medicine

These new residents will spend their first year rotating between a general hospital and emergency room, veterans hospital and a trauma center, developing their knowledge and surgery skills in a variety of medical disciplines to prepare for their intensive orthopaedic studies. They will work in general surgery for six months, orthopaedic surgery for three months, and a combination of general and orthopedic surgery for an additional three months.

The Campbell Foundation also welcomes these Fellows who have completed an orthopaedic residency and will spend up to 12 months of additional training in their chosen orthopaedic subspecialty:

- **Dr. Daniel Judd** – Foot & Ankle Surgery, from Kailua, Hawaii
- **Dr. Seth Rosenzweig** – Sports Medicine, from Birmingham, Alabama
- **Dr. Shiraz Younas** – Pediatric Orthopaedics, from Houston, Texas

Dr. Alvin J. Ingram

Annual lecture honors Dr. Alvin Ingram

In May Campbell senior residents participate in an annual lecture program, named in memory of Campbell Clinic physician Dr. Alvin J. Ingram. The residents present their research papers, which are the culmination of some of their research efforts during their residency.

A nationally-known orthopaedic surgeon is invited to participate in the program and this year's special guest speaker was Dr. E. Anthony Rankin, Professor at Howard University and current president of the American Academy of Orthopaedic Surgeons. His presentation was entitled *"Carpal Tunnel Syndrome: Then and Now."*

The Alvin J. Ingram Memorial Lecture was established by the Ingram family, following his death in 1999. Dr. Ingram was raised in Jackson, Tennessee, and received his BS, MS and MD degrees from the University of Tennessee, Memphis. After two fellowships at Campbell, he joined the staff in 1947 as a pediatric surgeon and served as chief of staff from 1969 to 1976. He retired in 1983.

A World War II Army veteran, Dr. Ingram was the only orthopaedist in a group of 10 physicians who were invited by President Lyndon Johnson in 1968 to tour the active field hospitals in Vietnam. He served as president of many organizations, including the Tennessee Orthopaedic Society, American Orthopaedic Association, and American Board of Orthopaedic Surgery.

Among his honors, Dr. Ingram was given the Distinguished Alumnus award from UT Memphis, Distinguished Southern Surgeon Award from the Southern Orthopaedic Association, and the Pioneer Award from the Pediatric Orthopaedic Society of North America.

Senior residents presented papers at Ingram lecture
