

**2020 Footprints in Motion  
Considerations for Guest Safety amidst the COVID-19 Environment  
October 1, 2020 Statement**

The outbreak of coronavirus 2019 (COVID-19) is an issue of enormous scale and human impact, and our hearts go out to all who have been affected.

The pandemic is changing the way the world connects, communicates and celebrates. But, together, we move forward.

Footprints in Motion is the Campbell Foundation's single biggest fundraiser and community builder, supporting our international medical missions and the Center of Excellence for Cerebral Palsy Care at Le Bonheur Children's Hospital, and we were so hopeful to host the 2020 event in person. However, with the health and well-being of our partners, patrons and employees as our top priority, we have decided that our best course of action is to transition to a virtual platform.

**This year's event will be an online auction and donation drive, kicking off on Giving Tuesday, December 1, 2020, and culminating on Friday, December 4.**

People across the globe rely on the funds raised at Footprints in Motion. Dr. Carson Rider, winner of the 2020 Molly Shumate Community Service Scholarship, traveled to Guatemala in early March, providing greatly needed orthopaedic care to residents in that country. And the CP Center has remained open throughout the pandemic, providing children with cerebral palsy and other crippling neuromuscular diseases - and the families who care for them - life-changing help and hope.

**Our work continues because the need is great.**

We are so grateful for your support and ask that you consider moving forward with us, continuing to set more "footprints in motion."
